## Sewer Line Repair

### WHAT:

A road dig-up will be required, and sanitary mainline repair will be taking place within the Bradford Capital Subdivision

### WHERE & WHEN:

- April 15-18, 2019 – 280 Inverness Way to 294 Inverness Way
- April 22- 23, 2019 – 65 Tupling Street to 73 Tupling Street
- April 23-26, 2019 – 72 Inverness Way to 84 Inverness Way

Both sides of the streets will be affected. All completion dates are weather-dependant.

### WHY:

The work is necessary to complete preventative maintenance of the sanitary sewer in the noted area.

### HOW YOU MAY BE AFFECTED:

All residents in the work area will receive notices at their door. No services will be affected unless a second notification is given on-site.

Residents may be asked to temporarily stop usage of utilities for a short period of time to allow the construction workers to connect the service laterals to the mainline.

Access to driveways may be unavailable to the affected residents. Affected residents will be asked to park in permitted zones on the street outside of the construction zone limits.

We apologize for any inconvenience. Your co-operation and understanding on this matter is most appreciated.
