

NOTICE

Stormwater Management Pond Cleaning

WHAT/WHERE:

The stormwater management pond located along Langford Boulevard north of the watercourse will be cleaned to remove sediment and debris.

WHEN:

The process will take approximately three weeks, beginning February 6, 2019. Inclement weather conditions may impact the duration of the project.

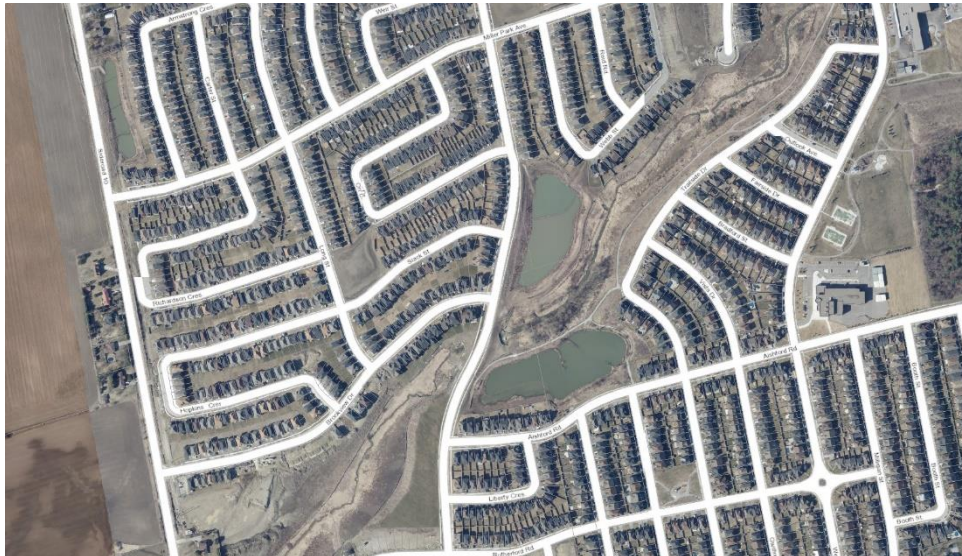

WHY:

The developer is preparing the pond for assumption by the Town, and is required to remove any accumulated sedimentation and return the pond to its original condition as approved by the Ministry of Environment, Conservation and Parks (MECP).

HOW:

The cleaning operation will consist of four steps:

1. Pumping down the water level in the pond.
2. Removal of the accumulated sediment and debris by truck.
3. Repairs to the pond as deemed necessary during the cleaning operation.
4. Returning the pond to operating condition.
