

NOTICE: Tree Removal

May 31st, 2017

South West Arterial Road – Line 5

WHAT:

To prepare the “employment lands” located in the area of Highway 400 between County Road 88 and Line 5 for new development, the Town is preparing for the South West Arterial Road widening project.

To conduct this work, the Town must remove some of the trees within the public right-of-way (shoulder/ditch) along Line 5, between Coffey Road and Sideroad 10. This will allow the Town to conduct the necessary utility relocations and road widening in the future.

WHERE:

This focus of the tree removal work will be along Line 5, between Coffey Road and Sideroad 10 on both the north and south side of Line 5.

WHEN:

The Town’s contractor is expected to begin the work mid-June, 2017 – weather dependant – and is expected to wrap up in August of this year.

HOW YOU MAY BE AFFECTED:

The work will be contained within the right-of-way Line 5 and will not occur on private property. In addition to the tree removal work, select farm fence installation and removal, and general restoration at the locations where contractor has disturbed the ground.

As part of the future road work, the Town has allotted for boulevard trees to be planted along the new road alignment to help offset the removal of the trees this year. However, the replanting of these boulevard trees will not take place until the road work has neared completion.

CONTACT INFORMATION:

We apologize for any inconvenience this work may cause. If you have questions or concerns, please contact the following:
