

NOTICE OF ROAD WORK

ASPHALT REJUVENATION PROJECT

WHERE:

Work will be taking place on Holland Street West, between Melbourne Drive and Sideroad 10.

WHEN:

Work is expected to begin on Tuesday, June 12th, weather permitting, and is expected to take approximately two to three days to complete.

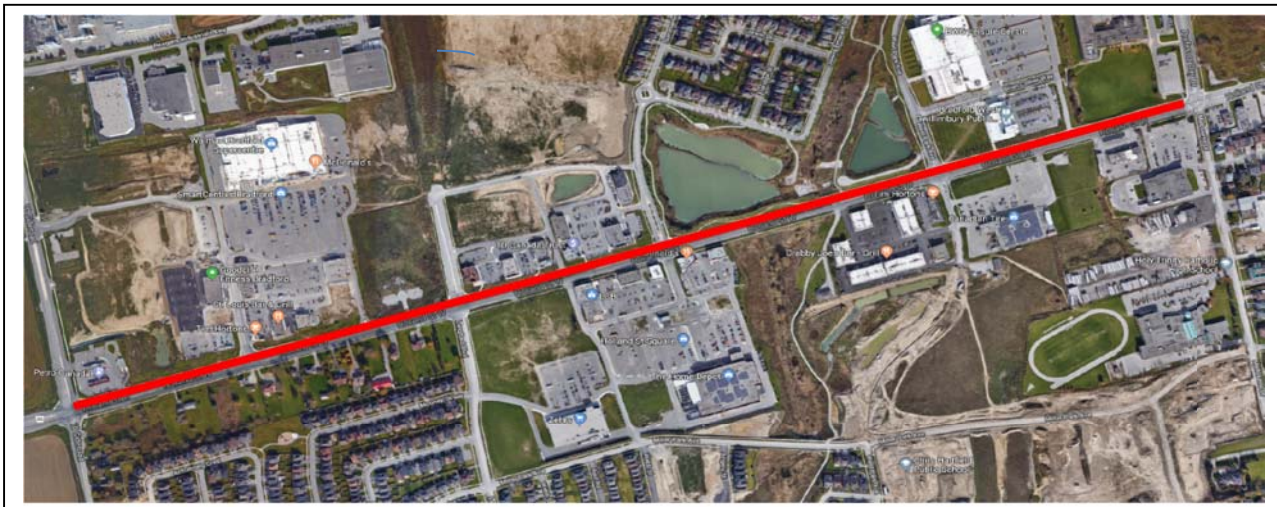

WHAT:

Work will include spraying the existing road surface with a non-toxic liquid product, which restores the chemical properties of asphalt, extending the life of the roadway. A temporary application of limestone screenings will be placed on the road to restore traction and prevent tracking of the emulsion. The process is completed by sweeping the excess screenings from the road surface and restoring normal traffic.

HOW YOU MAY BE AFFECTED:

When travelling through the work zone, motorists can expect delays as a result of lane reductions and work crews. Access to residential and commercial properties will be maintained, however some minor delays may be encountered as the work passes in front of each driveway.

Motorists may wish to consider an alternate route through Town while the work is being done. We apologize for any inconvenience you may experience during this time.
