

NOTICE

Stormwater Pond Cleaning

WHAT:

Sandstorm Developments (Great Gulf) will be cleaning a stormwater pond within their development area to remove excess sediment and debris.

WHERE:

The stormwater pond is located on the west side of West Park Ave., north of Holland St. W (across from the Leisure Centre and Library).

WHEN:

The project will take place throughout the month of August, 2017. Lane closures will be in effect for 2-3 weeks in mid-August.

HOW YOU MAY BE AFFECTED:

- **Lane closures:** The work will require the closure of one southbound lane along West Park Ave. north of Holland St. W (the curb lane approaching Holland St. W). This portion of the work is weather dependent, but is anticipated to start the week of August 7 and last for a period of 2 to 3 weeks. The lane will be reopened each evening and the lane swept and cleaned.
- **Heavy trucks and dirt:** To minimize the time required for this work, the contractor will be using large earthmoving trucks that can move larger quantities of material. The trucks will use the closed lane on West Park Ave. as their “mud mat”, then travel west along Holland St. to Langford Blvd. and north to a drying area in the Sandstorm Development. The Town will be monitoring to ensure the roads are kept as clean as possible.
- **Sidewalks and trails:** For safety, the sidewalk along the west side of West Park Ave. from Holland St. W to the trail will be closed to the public for the duration of the work. (see map)
